

Chug, chug. Puff, puff.
Casey the little engine
was hard at work.

With a tug of her trusty hook,
she pulled the cars into place.

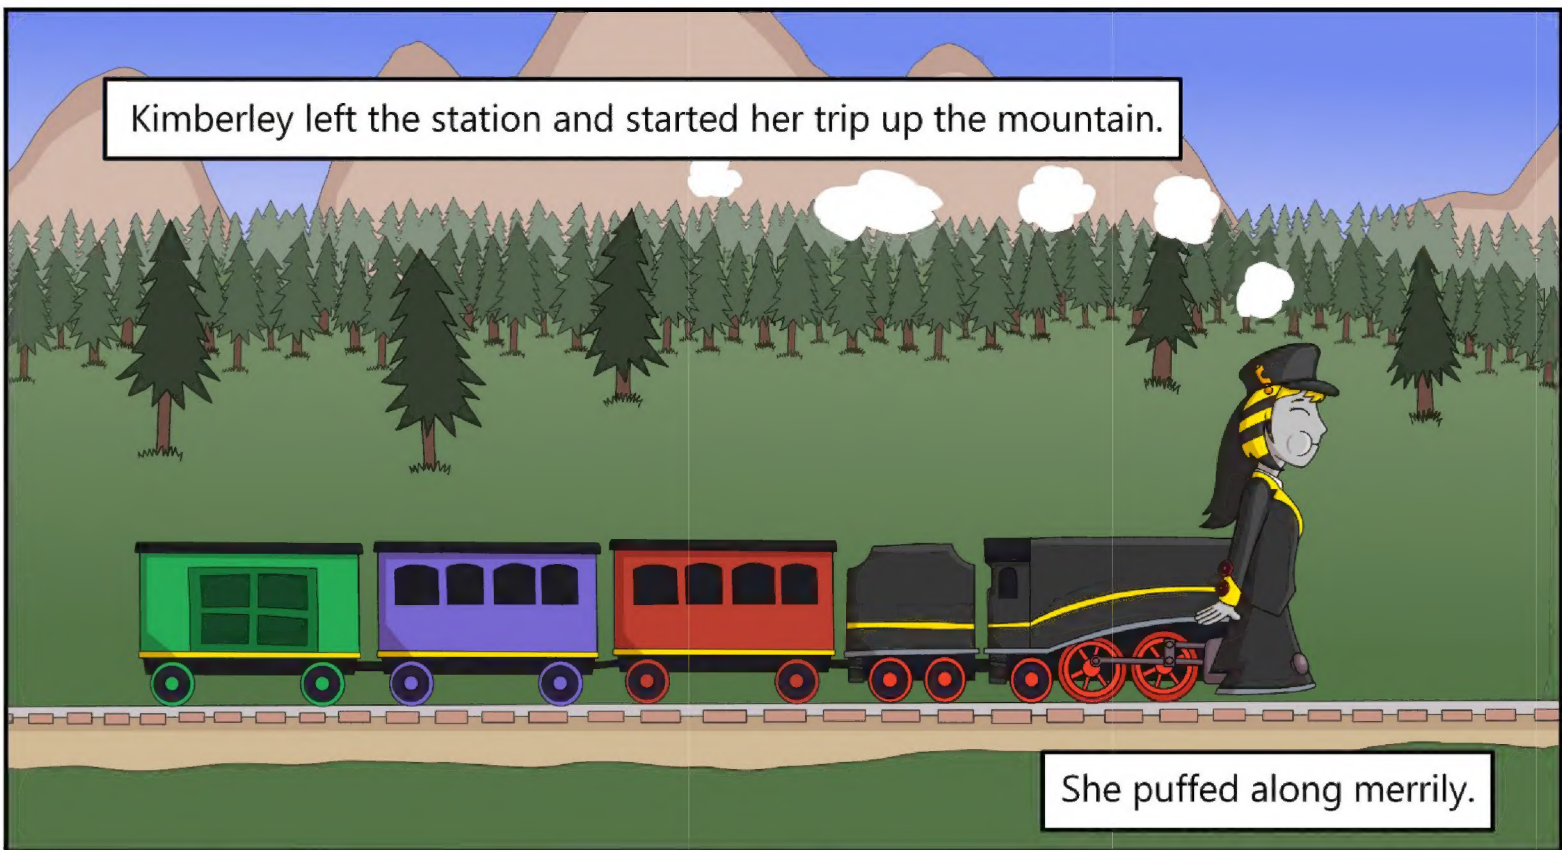

Every day, the little engine would fetch
cars for the bigger engines to pull.

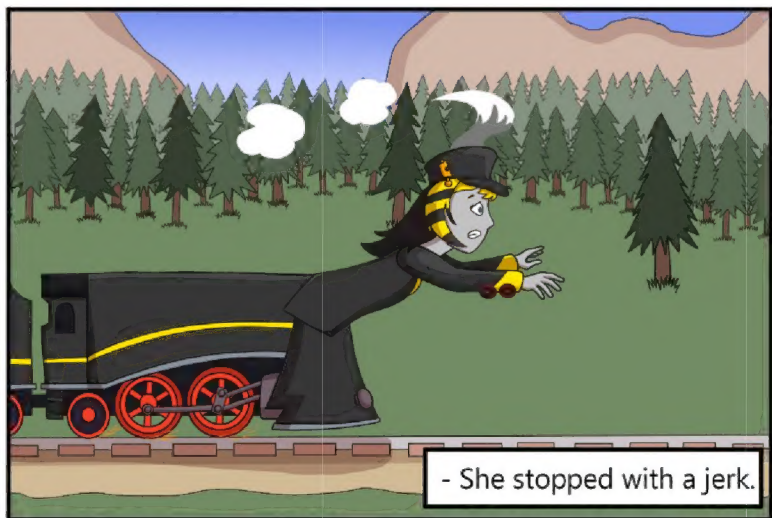

Kimberley left the station and started her trip up the mountain.

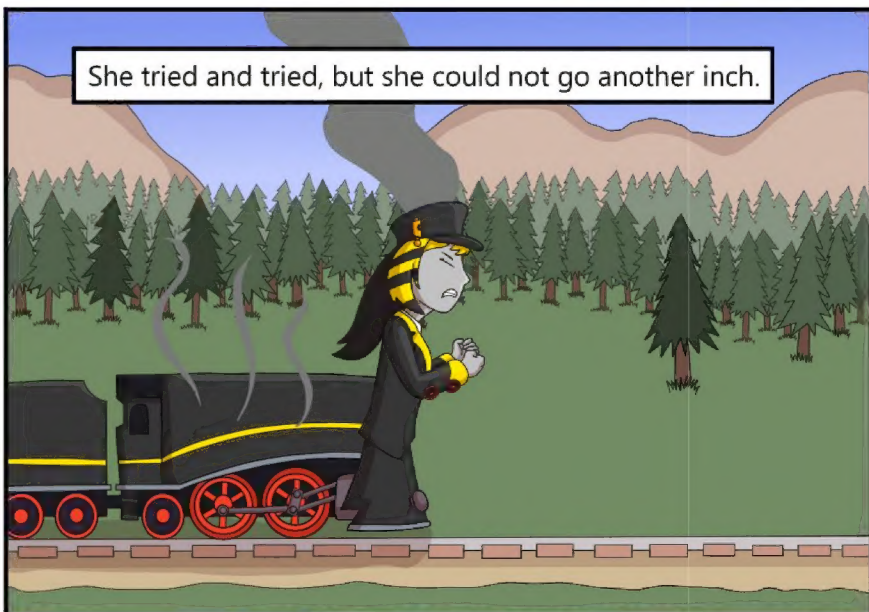

She puffed along merrily.

When suddenly-

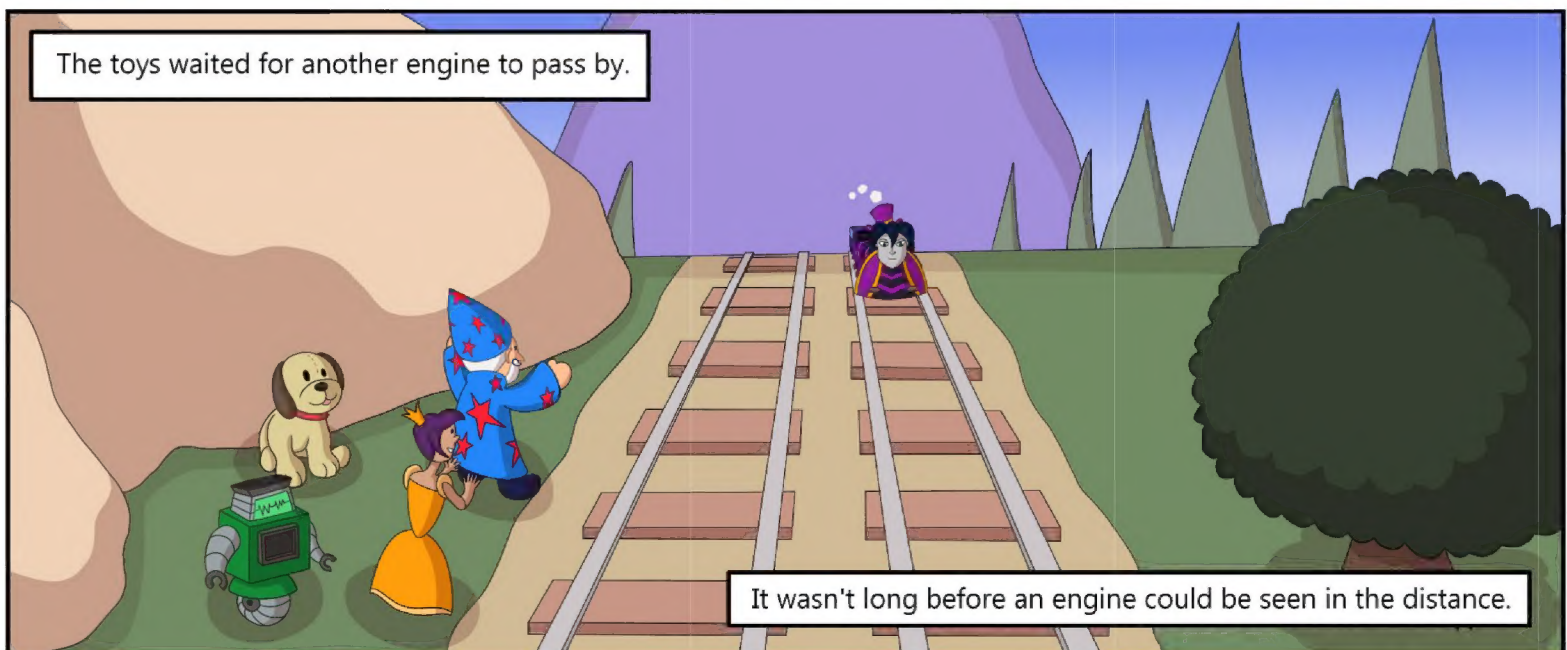

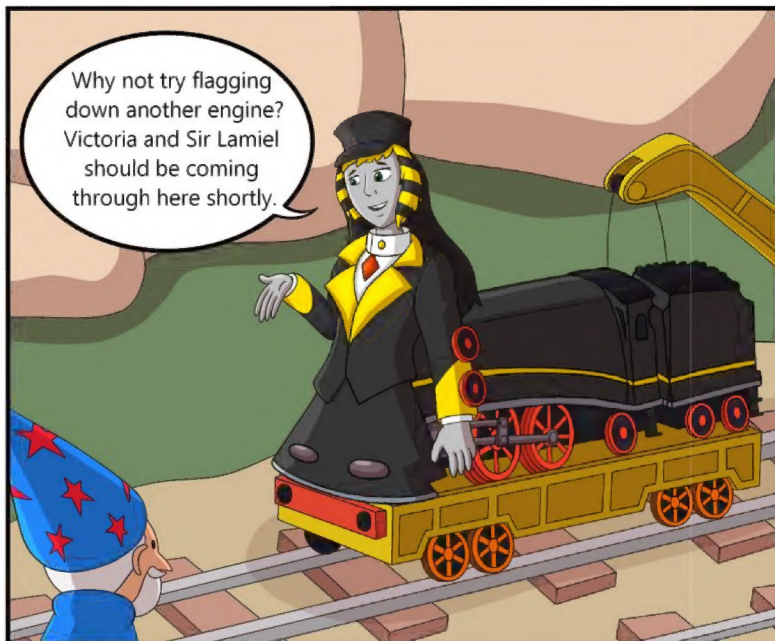

- She stopped with a jerk.

She tried and tried, but she could not go another inch.

Her wheels simply would not turn.

It was Victoria, pulling the Express.

Flagging her down, the toys ask...

Me?

Pull the likes of you?

I am the Express, the top of the line engine, pulling top of the line passengers.

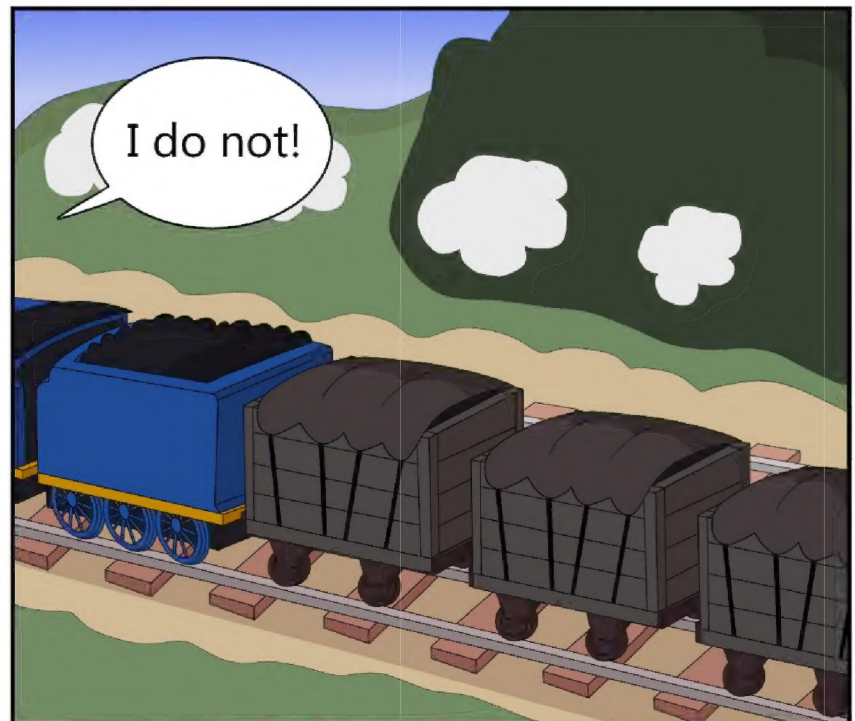

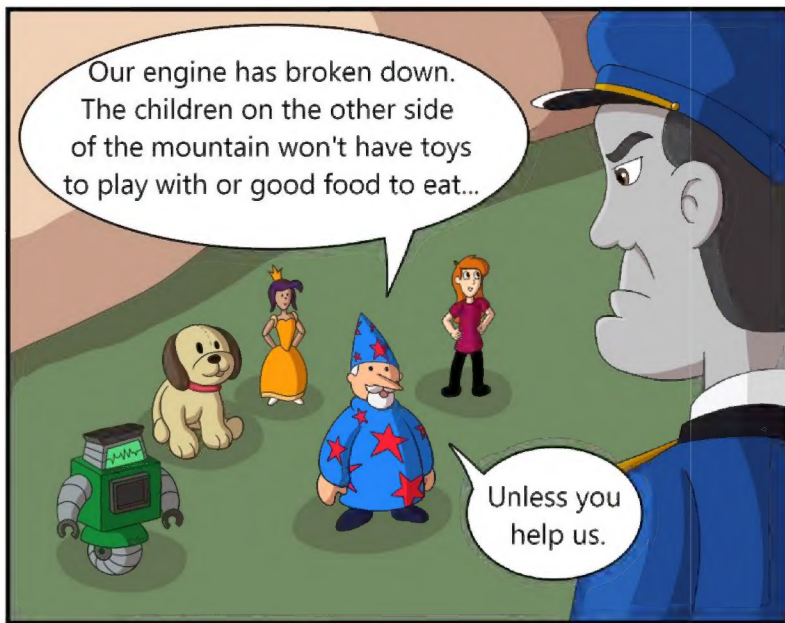

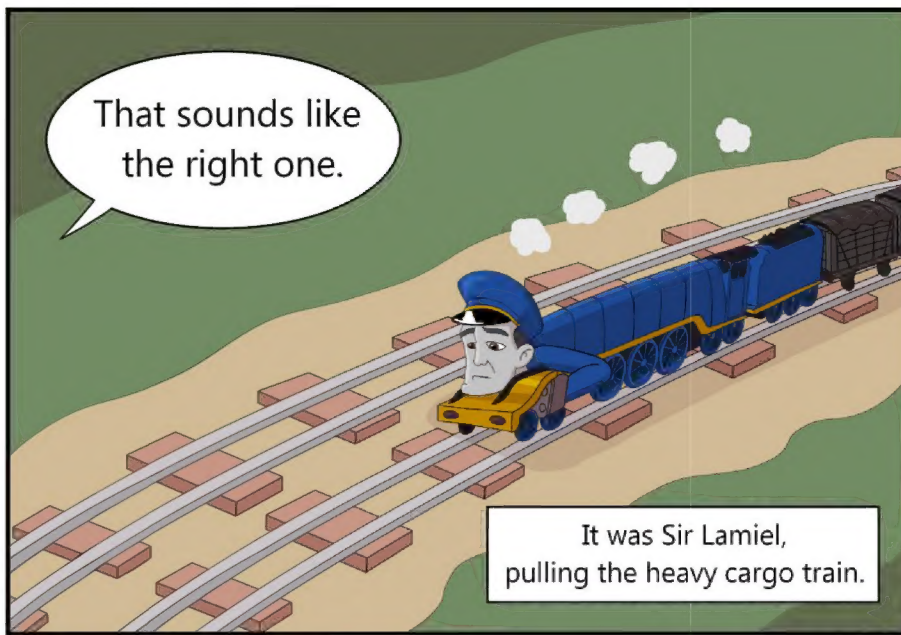

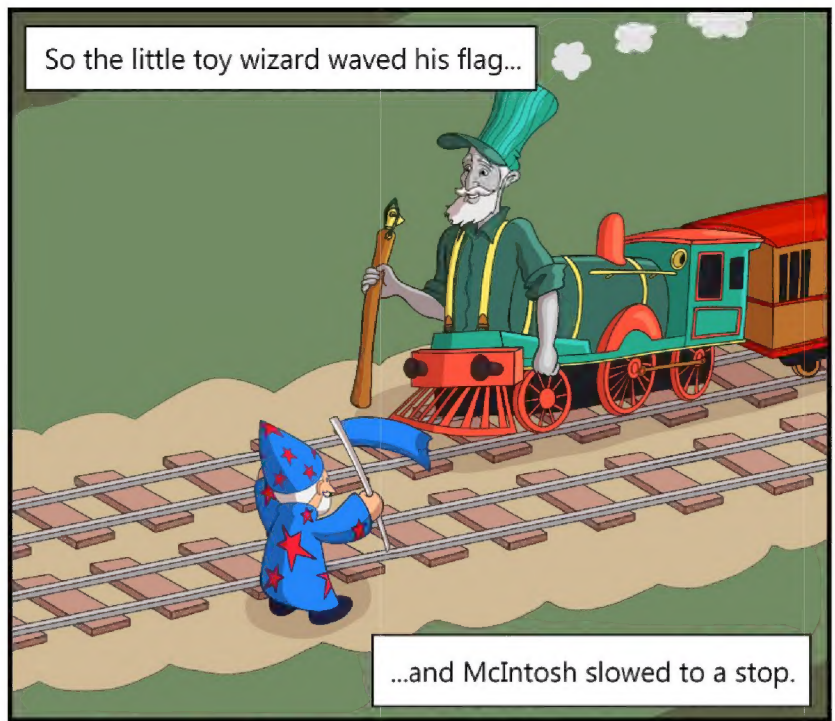

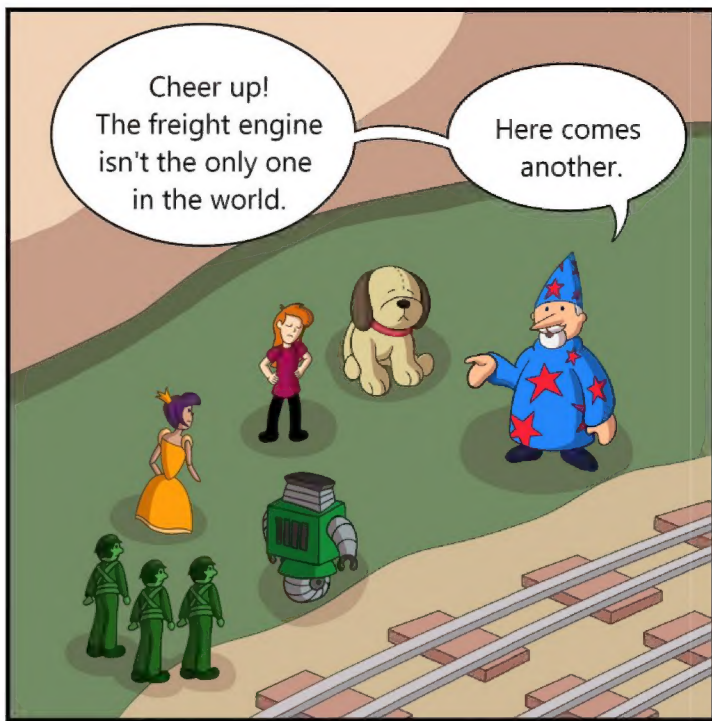

Pulling anything else is beneath my station.

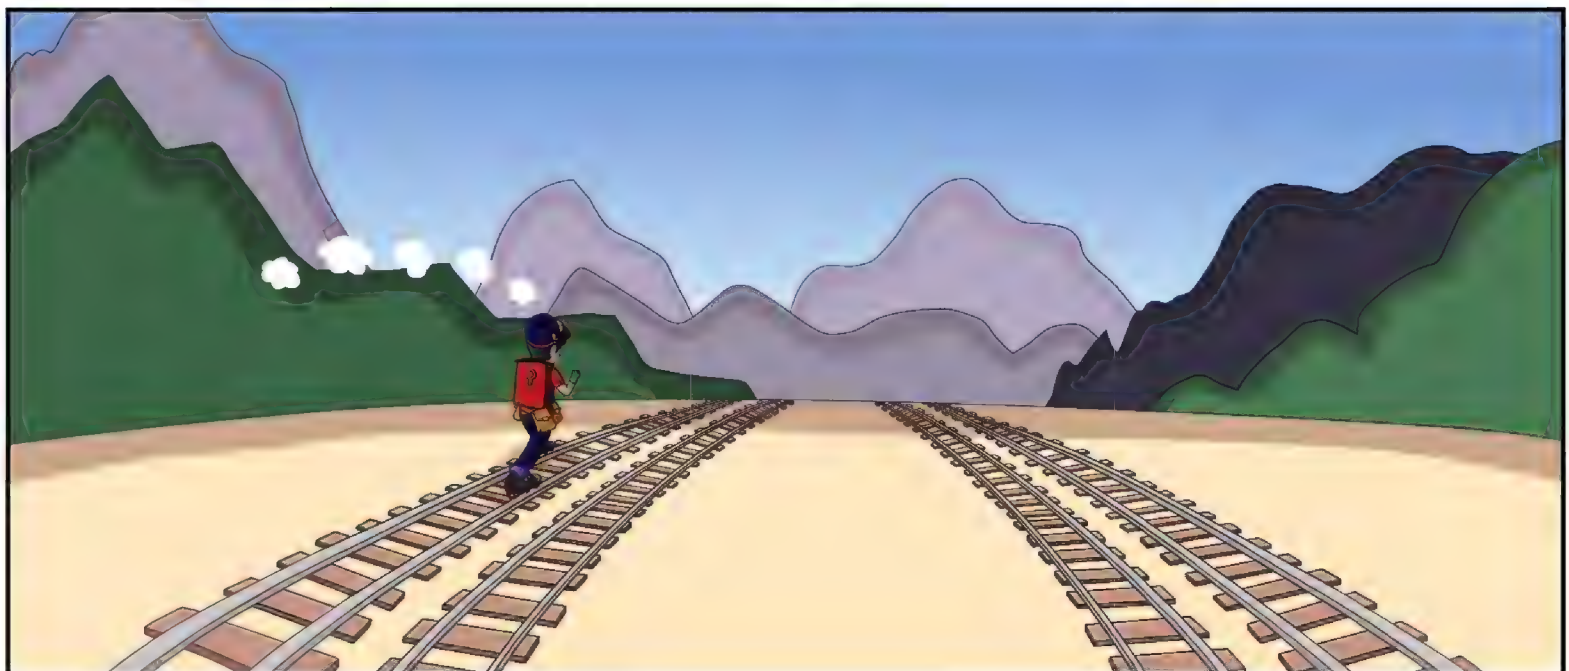

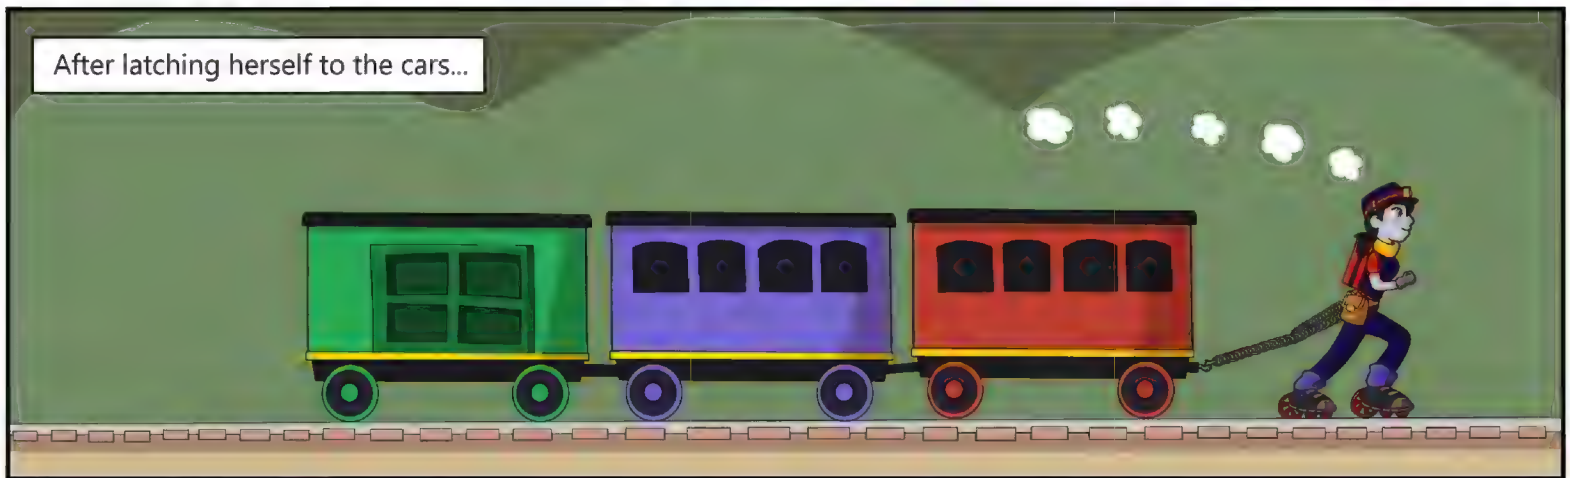

I don't think she was the right one for us anyway.

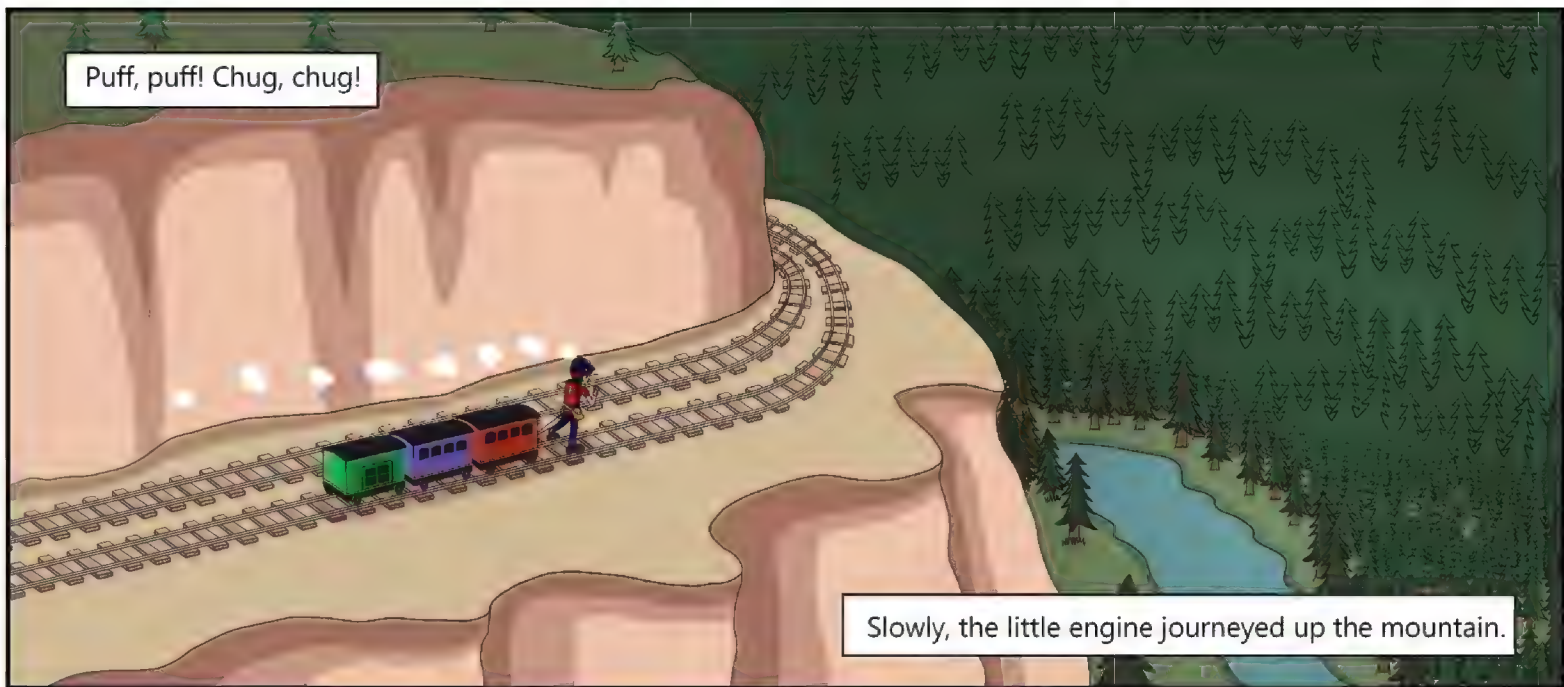

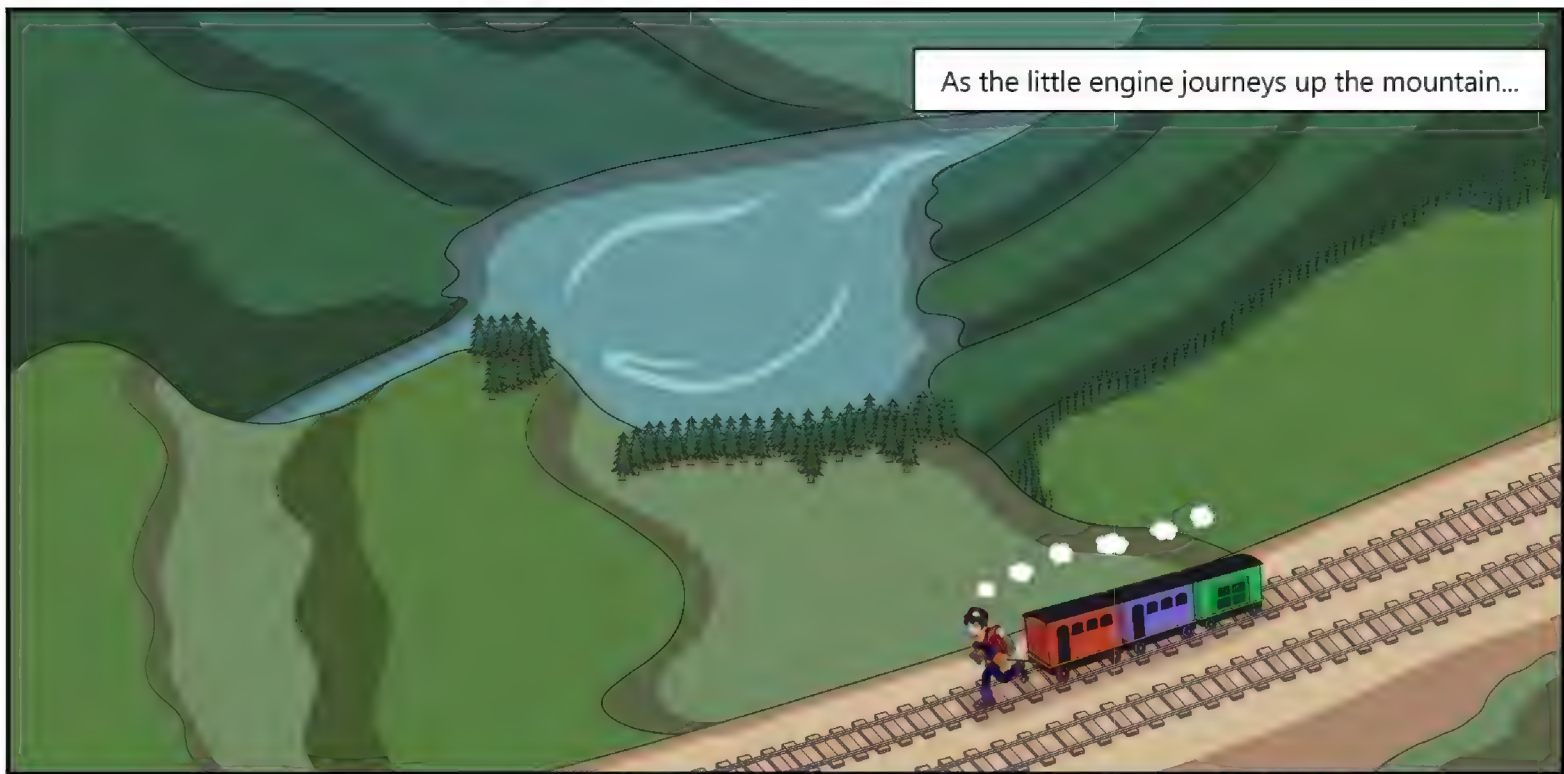

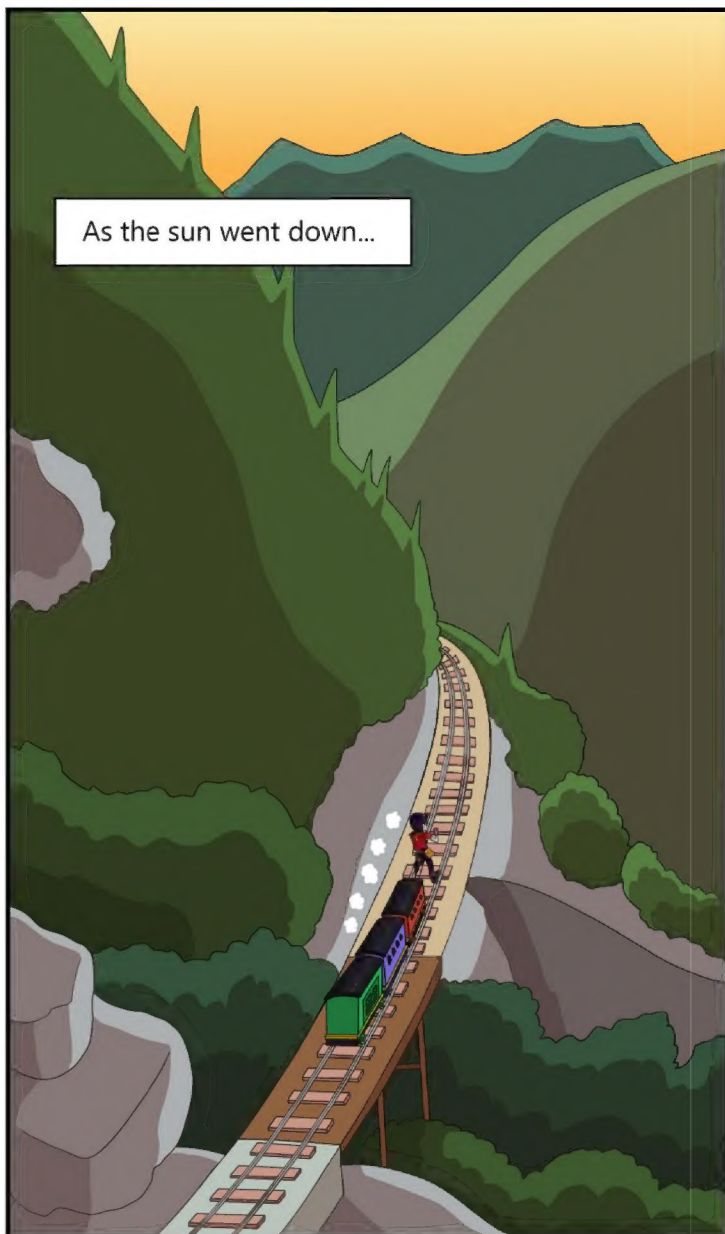

As the little engine journeys up the mountain...

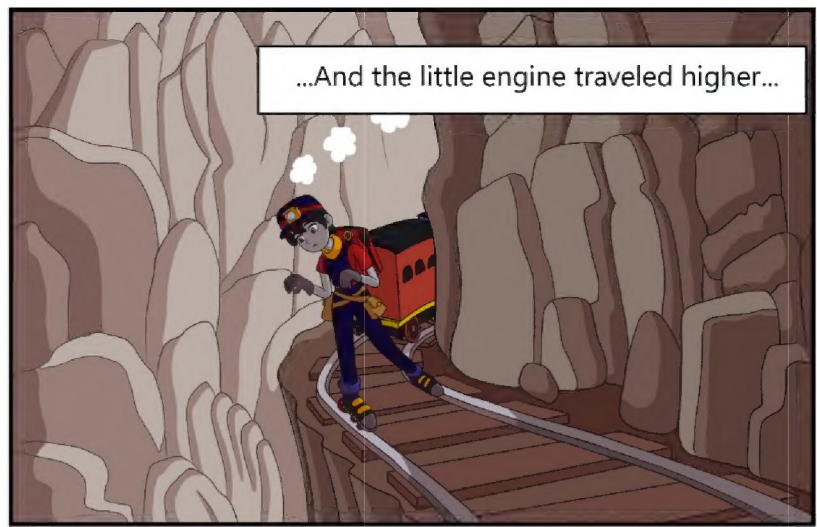

...She passes by another engine going down.

As the sun went down...

...And the little engine traveled higher...

...the path becomes dark and spooky.

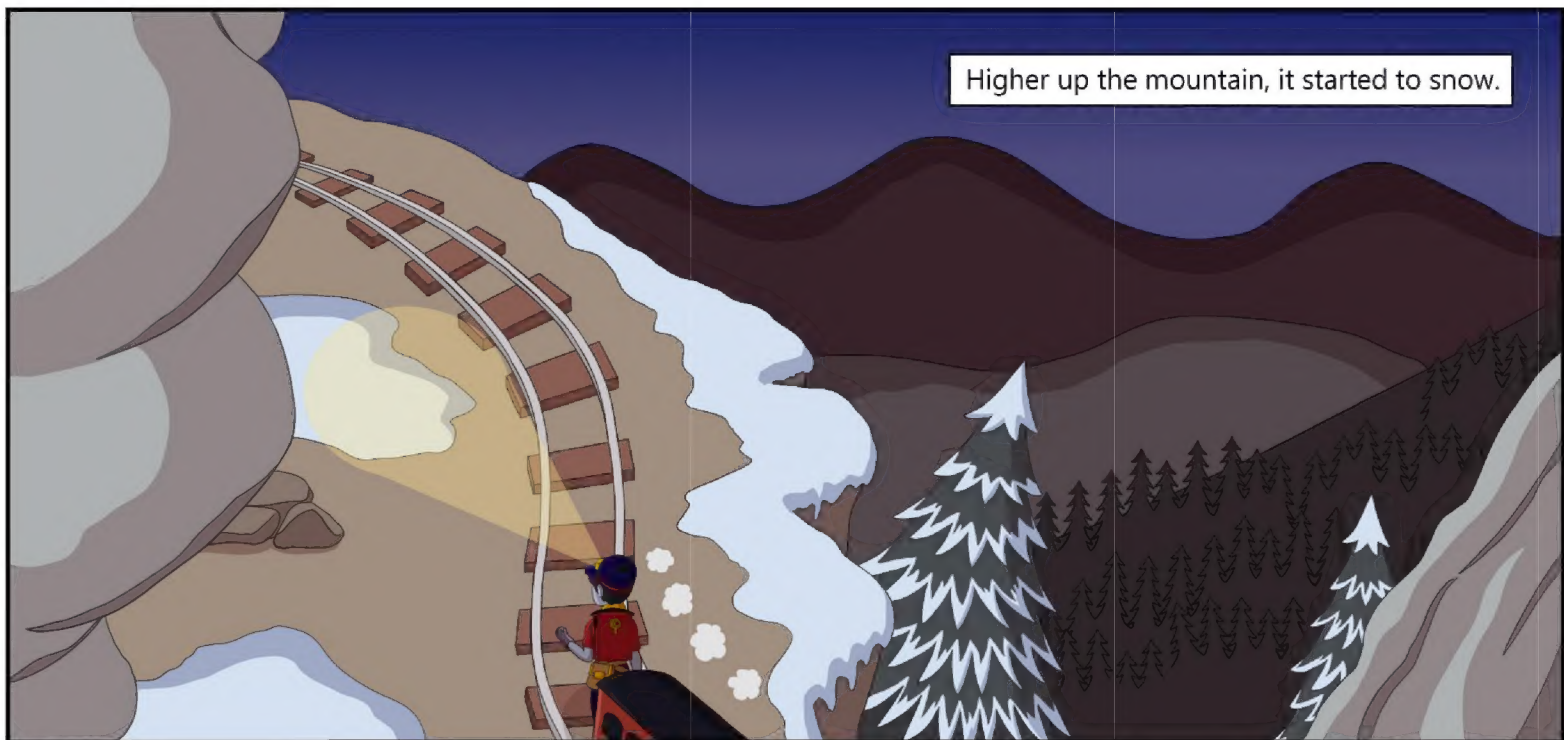

But the little engine flicked on her lamp and repeated...

I think
I can.

I think
I can.

I think
I can.

Higher up the mountain, it started to snow.

The tracks became slippery.

Despite her wheels spinning forward...

...She found herself slipping backward.

The little engine quickly pulled a cuppler from her bag.

Lassoing a tree, the little engine stopped slipping backward.

One!
More!
Try!

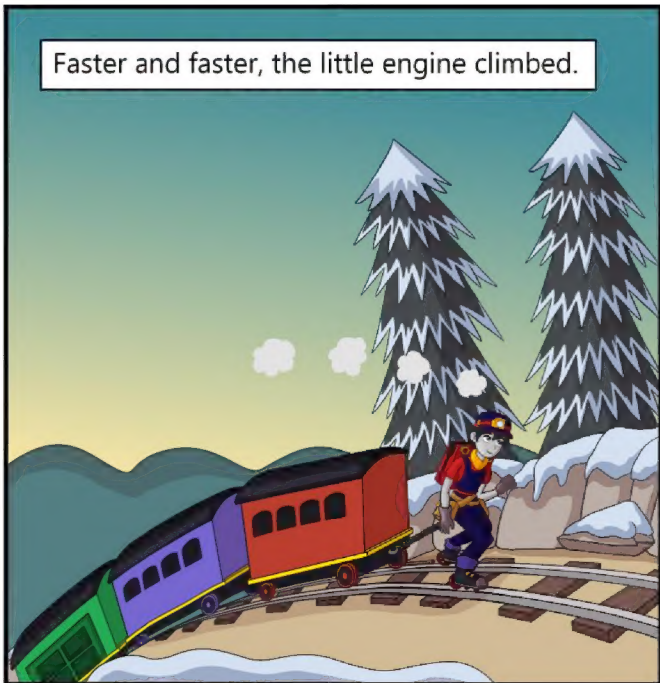

The little engine began to tug and pull.

And slowly, she pulled them up the hill.

Faster and faster, the little engine climbed.

Until at last, they were over the mountain.

The big engines were shocked to see Casey pull into the station.

The toys cheered.

Thank you,
kind little engine!

But how?

I thought
I could!
